Summary

Junior Full-Stack Developer passionate about building scalable web applications and real-world digital products. Experienced with JavaScript, React, Next.js, Node.js, Express.js, MongoDB and REST APIs. Currently building Cinemovira, a multilingual movie discovery platform with a strong focus on SEO, performance and user experience. Continuously learning and improving through real-world projects.

Projects

Cinemovira – Multilingual Movie Discovery Platform

2025–Present **Live: →**cinemovira.com

- Built a multilingual movie discovery platform using React, Next.js, Node.js, Express.js, MongoDB, Redis, TMDB API
- Implemented SEO-friendly dynamic pages, multilingual routing and sitemap generation.
- Developed REST APIs for movies, trailers and similar movie recommendations.
- Optimized performance with server-side rendering and caching.

TaskPro – Full Stack Task Management Application

2025

Live Demo
GitHub Repo

- Developed a full-stack task management application.
- Implemented user authentication and CRUD operations.
- Built RESTful APIs with Express.js and MongoDB.
- Responsive UI using React.

Cinemania – Team Project

2025

Live Demo
GitHub Repo

- Collaborated in a team to develop a movie discovery application.
- Implemented movie search, details, favorites and dark mode.
- Consumed TMDB REST API.
- Worked using Git and GitHub collaboration workflow.

Experience

Production Specialist – Bakery Manufacturing Sector

Self-employed / Istanbul, Turkey

2009-Present

- Experienced in bakery production processes, including preparation, manufacturing, and quality control.
- Contribute to daily production operations while maintaining product quality and efficiency.
- Developed strong skills in time management, problem-solving, teamwork, and working under pressure.
- Continue working in the bakery manufacturing sector while developing my software engineering skills.
